

# CONTINUOUS IMPROVEMENT & ONE-OFF PROJECTS

At GenSight, we understand that businesses need to be able to pivot and keep pace with an ever-changing landscape. We're here as your partner for success. With decades of best practices and global experience, our goal is to guide you every step of the way.

You aren't just buying a software product. You are gaining direct access to an elite group of global consultants who bring you, not only white-glove service, but the knowledge and expertise to help guide your business to the ability to make world class decisions and effective strategic planning.

## Continuous Improvement

Continuous improvement avoids stagnation and ensures your business moves forward, keeping pace with changing markets and giving you a competitive advantage. When it comes to software implementation as well as organizational change, small, planned, coordinated change is easier to adapt to and promotes wider adoption. Impactful, frequent changes keep the focus narrow and limits distractions, reduces burnout, and increases the odds of project success.

## One-Off Projects

One-off projects are best served to complement and enhance your on-going system maintenance and improvements. These projects are an excellent way to adjust to large changes in your organization at speed by securing a temporary increase in GenSight's dedicated resources or to obtain customized software development.

## Add-On Services

### Continuous Improvement Subscription

Select a tier of our continuous improvement subscription and receive a dedicated consultant. Your consultant will meet with you on a recurring basis to advise, design, and implement system changes and improvements.

### One-Off Projects

One-Off project requests are available at any time during the year, subject to resourcing availability. They undergo the scoping, quoting and PO process.
